CARE Patrol™
Your Partner In Senior Care Solutions

https://carepatrol.com

CarePatrol provides senior care options based on individual needs and preferences to ensure the quality of life for your loved one.

Whether being discharged from a hospital or care setting, or if extra care support is needed due to a recent change in a health condition, our 3-step process ensures safety, quality, and peace of mind.

1. Discovery

To match your patient or client with a community that best fits his or her emotional and physical needs, we need to ask some personal questions. But rest assured, we're known for being "carefrontational" not confrontational.

Preserving dignity.

2. Explore Care Options

Based on our site evaluations and Care Discovery session, we will present your patient or client with the top 3 community matches. Then we will provide a personal tour of each to view the accommodations and speak to the concierge directly.

Guiding at every step.

3. Care Decision

Care needs can change over the next months or years. We'll help your patient or client understand what to expect in order to feel comfortable knowing the care setting chosen can meet those needs.

Expert advice you can rely on.
